Special Topics in Mathematical Physiology:
Computational Modeling of Neuronal Systems

Student Information

Name: ________________________________

Email Address: __________________________

Department: ____________________________

Status (e.g., MS student, PostDoc): ________________________________

Credit/FullAudit/PartialAudit
(give probability): ________________________________

What do you hope to get out of this course (e.g., broad overview of field, new application areas for mathematics, methods for data analysis)?

Which topics are most/least important to you?
