Wednesday, May 24, 2017
Eisner & Lubin Auditorium

09:05 - 09:10 Introductory remarks

**Session I: Flexible Attention**
*Chair and Discussant: Lila Davachi*
09:10 - 09:30 **Kia Nobre:** TBA
09:30 - 09:50 **Elissa Aminoff:** Associative processing in scene perception
09:50 - 10:10 **Bradley Postle:** Selection and priority in working memory
10:10 - 10:30 **Clay Curtis:** Frontal and parietal topographic maps constrain working memory precision
10:30 - 10:50 Discussion

10:50 - 11:15 Coffee Break

**Session II: Flexibility over Time**
*Chair and Discussant: Cristina Alberini*
11:15- 11:35 **David Bucci:** Retrosplenial cortex and remote fear memory: Some surprising connections
11:35 -11:55 **Lila Davachi:** Memory transformations over time
11:55 -12:15 **Yadin Dudai:** Peri-encoding activity in the human brain
12:15 -12:35 Discussion

12:40 - 13:50 Lunch break

**Session III: Social Manifestations**
*Chair and Discussant: Robert Froemke*
13:50 - 14:10 **James Curley:** Coordination of contextually appropriate social behavior in dominance hierarchies
14:10 - 14:30 **Kevin Ochsner:** Recognizing the status of others within our social networks
14:30 - 14:50 **Elad Schneidman:** Information socialtaxis: how opportunistic agents can learn to gain knowledge from others
14:50 - 15:10 **Joseph LeDoux:** Semantic dangers in the New Age of Mentalism
15:10 - 15:30 Discussion

15:30 - 15:50 Coffee Break
Session IV: Competition and Integration
Chair and Discussant: Yadin Dudai
15:50 - 16:10 Andre Fenton: Competitive control of memory recollection
16:10 - 16:30 Daphna Shohamy: How memory shapes value-based decisions
16:30 - 16:50 Wendy Suzuki: Error based learning signals in the macaque medial temporal lobe
16:50 - 17:10 Discussion

17:15 - 18:45 Reception, Grand Hall
19:00 Speakers & Chairs Dinner

Thursday, May 25, 2017
Rosenthal Pavilion

Session V: Forgetting and Enhancement
Chair and Discussant: Jonathan Winawer
09:00 - 09:20 Paul Frankland: The persistence and transience of memory
09:20 - 09:40 Michael Anderson: Hippocampal GABA enables inhibitory control over unwanted thoughts
09:40 - 10:00 Cristina Alberini: Infantile amnesia: a critical period of learning to learn and remember
10:00 – 10:20 Tom Carew: The role of growth factor signaling in long-term memory formation in Aplysia
10:20 - 10:40 Discussion

10:40 - 11:00 Coffee Break

Session VI: Codes and Representations
Chair and Discussant: Marisa Carrasco
11:00 - 11:20 David Heeger: Theory of cortical function
11:20 - 11:40 Jayeeta Basu: Dynamic interactions between circuits for memory and sensory processing
11:40 -12:00 Gyorgy Buszaki: Space-time of navigation and memory
12:00 -12:20 Elizabeth Phelps: Factors influencing threat generalization in humans
12:20 - 12:40 Discussion

12:40 - 13:00 Concluding Remarks
13:00 Adjourn
