Announcement

Job Description:
A part-time position is available for a Lab Technician with an interest in the Clinical Neuroscience, Psychology and/or Economics of Decision-Making at NYU’s Center for Neural Science and Langone School of Medicine.

This position starts at the entry-level in a large federally funded laboratory with a mixture of research and administrative duties. We offer an exciting environment with opportunities for development and growth and are looking for a highly motivated and detail-oriented person with the ability to take on new challenges.

Key Duties and Position Responsibilities:
Coordinate research participant recruitment and follow-up.

Assist in running behavioral and brain imaging experiments with clinical population.

Assist research fellows and Principal Investigator to develop research protocols, analyze data, prepare manuscripts, and to contribute to long-term projects.

Learn and perform laboratory procedures and keep stocked inventory of lab supplies.

Attend lab and clinic staff meetings.

Minimum Qualifications:
Applicants must have the ability to commit to this position for at least one year.

A B.A. or B.S. in Neuroscience, Psychology, Economics or a related discipline is preferred.

Must have strong time management and organizational skills.

Must be able to manage competing priorities with close attention to details.

Excellent interpersonal, written, and oral communication skills required.

Experience in a laboratory setting is highly desirable.

Experience with working with clinical populations is desirable but not required.

To Apply:
Please e-mail a CV, a cover letter detailing a brief description of research experience and interests, and contact information for 1-3 references to Anna Konova (abk288@nyu.edu) and Silvia Lopez-Guzman (silvia.lopez@nyu.edu). Please include both recipients on any correspondence.

NYU is an equal opportunity employer.
